## Capital Adequacy

<ul> <li>(a) A summary discussion of the bank's approach to assessing the adequacy of its capital to support current and future activities.</li> <li>The Bank assesses the adequacy of its capital in terms of Section 13 (1) of the Bank Company Act, 1991 (Amended up to 2023) and instruction contained in BRPD Circular No. 18 dated 21 December 2014 [Guidelines on 'Risk Based Capital Adequacy for Banks' (Revised regulatory capital framework in line with Basel III)] and other relevant rules &amp; regulation issued by BB from time to time.</li> <li>However, in terms of the regulatory guidelines, the Bank computes the capital charge/ requirement as under: <ul> <li>i. Credit risk: On the basis of Standardized Approach;</li> <li>ii. Operational risk: On the basis of Basic Indicator Approach.</li> </ul> </li> <li>The Bank assesses the capital requirement considering the existing size of portfolio, concentration of portfolio to different risk weight groups, asset quality, profit trend etc. on quarterly rest. The Bank also forecasts the adequacy of capital in terms of its capacity of internal capital generation, maintaining the size of the portfolio, asset quality, conducting credit rating of the borrowers, segregation of portfolio to different risk weight groups, etc. As of 31 December 2023, Bank maintained total capital (CET1/Tier 1 and Tier 2) of Table CEN the Julion action of the Julion action the part of the capital capital years and the capital years.</li> </ul>
of Taka 59.1 billion against the minimum requirement plus capital conservation buffer of Taka 45.7 billion with a surplus of Taka 13.4 billion. Bank's capital to risk-weighted asset ratio (CRAR) as of 31 December 2023 stood at 16.16% (consisting of 11.84% in CET 1/Tier1 capital and 4.32% in Tier 2 capital) against the regulatory requirement of minimum plus capital conservation buffer 12.50%. This surplus capital both in term of absolute amount and ratio (CRAR) is considered to be adequate to absorb all the material risks to which the Bank may be exposed in future. The Bank maintained more than adequate capital against the regulatory requirement to uphold and strengthen the confidence of its investors, depositors and other stakeholders.

#### **Credit Risk**

#### **Qualitative Disclosures**

(a) The general qualitative disclosure requirement with respect to credit risk, including:

(i) Definitions of past due and impaired As per relevant Bangladesh Bank guidelines, the Bank defines the past due and impaired loans and advances for strengthening the credit (for accounting purposes); discipline and mitigating the credit risk of the Bank. The impaired loans and advances are defined on the basis of (i) Objective/ Quantitative Criteria and (ii) Qualitative judgment. For this purposes, all loans and advances are grouped into four (4) categories namely- (a) Continuous Loan, (b) Demand Loan, (c) Fixed Term Loan, and (d) Short-term Agricultural & Micro Credit. Definition of past due/ overdue: i) Any Continuous Loan if not repaid/ renewed within the fixed expiry date for repayment or after the demand by the bank will be treated as past due/ overdue from the following day of the expiry date; ii) Any Demand Loan if not repaid within the fixed expiry date for repayment or after the demand by the bank will be treated as past due/ overdue from the following day of the expiry date;

iii) In case of any installment(s) or part of installment(s) of a Fixed Term Loan is not repaid within the fixed expiry date, the amount of unpaid installment(s) will be treated as past due/ overdue after six months of the expiry date; and

iv) The Short-term Agricultural and Micro - Credit if not repaid within the fixed expiry date for repayment will be considered past due/overdue after six months of the expiry date.

However, a continuous loan, demand loan or a term loan which will remain overdue for a period of 2 (two) months or more, will be put into the **"Special Mention Account (SMA)"**, the prior status of becoming the loan into impaired/ classified/ non-performing.

Definition of impaired/ classified/ non-performing loans and advances are as follows:

#### Continuous loans are classified as follows:

- **Substandard:** If it is past due/ overdue for 3 (three) months or beyond but less than 9 (nine) months;
- **Doubtful:** If it is past due/ overdue for 9 (nine) months or beyond but less than 12 (twelve) months; and
- **Bad/ Loss:** If it is past due/overdue for 12 (twelve) months or beyond.

#### Demand loans are classified as follows:

- **Substandard:** If it remains past due/ overdue for 3 (three) months or beyond but less than 9 (nine) months from the date of expiry or claim by the Bank or from the date of creation of forced loan;
- **Doubtful:** If it remains past due/ overdue for 9 (nine) months or beyond but less than 12 (twelve) months from the date of expiry or claim by the Bank or from the date of creation of forced loan; and
- **Bad/ Loss:** If it remains past due/ overdue for 12 (twelve) months or beyond from the date of expiry or claim by the Bank or from the date of creation of forced loan.

#### Fixed Term Loans are classified as follows:

- **Substandard:** If the amount of past due installment is equal to or more than 3 (three) months but less than 9 (nine) months; the entire loan will be classified as 'Sub-standard';
- **Doubtful:** If the amount of past due installment is equal to or more than 9 (nine) months but less than 12 (twelve) months; the entire loan will be classified as 'Doubtful'; and
- **Bad/ Loss:** If the amount of past due installment more than 12 (twelve) months, the entire loan will be classified as 'Bad/Loss';

**Short-term Agricultural and Micro-credit:** The Short-term Agricultural and Micro Credit will be considered irregular if not repaid within the due date as stipulated in the loan agreement. If the said irregular status continues, the credit will be classified as **'Sub-standard'** after a period of **12 months**, as **'Doubtful'** after a period of **36 months** and as **'Bad/ Loss'** after a period of **60 months** from the stipulated due date as per the loan Agreement.

## **Operational risk**

1	operational risk					
	Qua	litative Disclosures				
a)		i) Views of Board of Directors (BODs) on system to reduce Operational Risk	The policy for operational risks including internal control and compliance risk is approved by the Board in line with the relevant guidelines of Bangladesh Bank. Audit Committee of the Board directly oversees the activities of Internal Control and Compliance Division (IC&CD) to protect against all operational risks. As a part of continued surveillance, the Management Committee (MANCOM), Executive Risk Management Committee (ERMC), MLTFPD, Vigilance Cell and independent Risk Management Division regularly review different aspects of operational risk. The analytical assessment was reported to the Board/ Risk Management Committee/ Audit Committee of the Bank for review and formulating appropriate policies, tool & techniques for mitigation of operational risk.			
		ii) Performance gap of executives and staffs	Dutch-Bangla Bank PLC has a policy to provide competitive package and best working environment to attract and retain the most talented people available in the industry. The Bank's strong brand image plays an important role in employee motivation. As a result, there is no significant performance gap.			
		iii) Potential external events	Like other peers, Dutch-Bangla Bank PLC operates its business with few external risk factors relating to the socio-economic condition, political atmosphere, regulatory policy changes, natural disaster etc. based on the overall perspective of the country. Potential external events and related downside risk, namely, damage of Bank's delivery channel including ATM, Fast Track, Agent Banking outlet etc. fear of theft/ robbery in banks vaults, compliance/ adjustment due to changes of regulatory policy stance, laws & regulations etc. are managed to keep within tolerable limit.			
		iv) Policies and processes for mitigating operational risk	The policy for operational risks including internal control and compliance risk is approved by the Board taking into account relevant guidelines of Bangladesh Bank. A policy guideline on Risk Based Internal Audit (RBIA)System is in operation. As per RBIA, branches with high risk status and subjected to more frequent audit by Internal Control and Compliance Division (IC&CD). IC&CD directly reports to Audit Committee of the Board.			
			In addition, there is a Vigilance Cell established in 2009 to reinforce the operational risk management of the Bank. Bank's Anti- Money laundering activities are headed by CAMLCO and their activities are devoted to protect against all money laundering and terrorist finance related activities. The Central Customer Service & Complaint Management Cell was also engaged in mitigating the operation risks of the Bank. Apart from that, there is adequate check and balance at every stage of operation, authorities are properly segregated and there is at least dual control on every transaction to protect against operational risk.

v)	Approach	for	calculating	capital	charge
fo	r operatior	ial r	isk		

The Bank follows the Basic Indicator Approach (BIA) in terms of BRPD Circular No. 18 dated 21 December2014 [Guidelines on **'Risk Based Capital Adequacy for Banks' (revised regulatory capital framework in line with Basel III)].** The BIA stipulates the capital charge for operational risk is a fixed percentage, denoted by  $\alpha$ (alpha) of average positive annual gross income of the Bank over the past three years. It also states that if the annual gross income for any year is negative or zero, that should be excluded from both the numerator and denominator when calculating the average gross income. The capital charge for operational risk is enumerated by applying the following formula:

 $K = [(GI1 + GI2 + GI3) \alpha]/n$ 

#### Where:

K = the capital charge under the Basic Indicator Approach

GI = only positive annual gross income over the previous three years (i.e. negative or zero gross income if any shall be excluded)

 $\alpha$  = 15 percent

 $\mathsf{n}$  = number of the previous three years for which gross income is positive.

Besides, Gross Income (GI) is calculated as "Net Interest Income" plus "Net non-Interest Income". The GI is also the net result of:

i) Gross of any provisions;

ii) Gross of operating expenses, including fees paid to outsourcing service providers;

iii) Excluding realized profits/ losses from the sale of securities held to maturity in the banking book;

iv) Excluding extraordinary or irregular items; and

v) Excluding income derived from insurance.

#### **Quantitative Disclosures**

b)	The capital requirement for operational risk	In	Million Taka
		Particulars	Amount
		Capital requirement for Operational Risk	4,634.6
		Total Capital Requirement for Operational Risk	4,634.6

## **Liquidity Ratio**

In line with the provisions of liquidity risk management under Basel III, Bangladesh Bank on the basis of the relevant guideline of Bank for International Settlements (BIS) has identified the (i) Liquidity Coverage Ratio (LCR); (ii) Net Stable Funding Ratio (NSFR); and (iii) Leverage Ratio under the purview of 'Liquidity' ratio vide BRPD Circular No. 18 dated 21 December 2014 and DOS Circular No.1 dated 1 January 2015.

Qua	litative Disclosures		
a)	i) Views of Board of Directors (BODs) on system to reduce Liquidity Risk	The Board of Directors reviews the liquidity risk of the Bank on quarterly rest while reviewing the Quarterly Financial Statements, Stress Testing Report etc. Besides, the EC of the Board also reviews the liquidity position while reviewing the management information system (MIS) report on monthly basis.	
		Upon reviewing the overall liquidity position along with the outlook of the Bank funding need, investment opportunity, market/industry trend, the Board takes its strategic decision regarding deposits, funding, investments, loans as well as interest rates policies etc.	
		The Board of the Bank always strives to maintain adequate liquidity to meet up Bank's overall funding need for the huge retail depositors, borrowers' requirements as well as maintain regulatory requirements comfortably.	
	ii) Methods used to measure Liquidity Risk	The maintenance of Cash Reserve Requirement (CRR) and Statutory Liquidity Ratio (SLR) is considered as the fundamental methods/ tools to measure the liquidity position/ risk of Dutch-Bangla Bank PLC.	
		However, under Basel III, the following methods and tools are mandated for measuring the liquidity risk.	
		a) Liquidity Coverage Ratio (LCR): Liquidity Coverage Ratio ensures to maintain an adequate level of stock of high quality liquid assets that can be converted into cash to meet its liquidity needs (i.e. total net cash outflows) over the next 30 calendar days.	
		<b>b)</b> Net Stable Funding Ratio (NSFR): Net Stable Funding Ratio aims to limit over-reliance on short -term wholesale funding during times of abundant market liquidity and encourage better assessment of liquidity risk across all on- and off-balance sheet items. The minimum acceptable value of this ratio is 100 percent, indicating that, available stable funding (ASF) should be at least equal to required stable funding (RSF).	
		ASF consists of various kinds of liabilities and capital with percentage weights attached given their perceived stability.	
		RSF consists of assets and off-balance sheet items also with percentage weights attached given the degree to which they are illiquid or "long-term" and therefore requires stable funding.	
		In addition to the above, the following measures have been put in place to monitor the liquidity risk management position of the Bank on a continued manner:	
		a) Asset- Liability Maturity Analysis (Liquidity profile); b) Advance Deposit Ratio (ADR);	

Lie	iquidity Ratio (Continued)		
		<ul> <li>c) Whole sale borrowing capacity; and</li> <li>d) Maximum Cumulative Outflow (MCO).</li> <li>Besides the above, the following tools are also used for measuring liquidity risk:</li> <li>a) Stress Testing (Liquidity Stress); and</li> <li>b) Net open position limit -to monitor the FX funding liquidity risk.</li> </ul>	
	iii) Liquidity risk managementsystem	In the Bank, at the management level, the liquidity risk is primarily managed by the Treasury Division (Front Office) under oversight of ALCO which is headed by the Managing Director & CEO along with other members of the senior management team. Treasury Division (Front Office) upon reviewing the overall funding requirements on daily basis sets their strategy to maintain a comfortable/ adequate liquidity position taking into consideration of Bank's approved credit deposit ratio, liquid assets to total assets ratio, asset-liability maturity profile, Bank's earning/ profitability as well as overall market behavior and sentiment etc. Apart from the above, Risk Management Division (RMD) also monitors & measures the liquidity risk in line with the Basel III liquidity measurement tools, namely, LCR, NSFR, Leverage Ratio. RMD addresses the key issues and strategies to maintain the Basel III liquidity ratios to the respective division(s) on regular interval.	
	iv) Policies and processes for mitigating Liquidity Risk	<ul> <li>The Asset-Liability (ALCO) policy leads the process &amp; procedures for mitigation of liquidity risk of the Bank.</li> <li>ALCO works under specific Terms of References (functions) approved by the Board.</li> <li>Treasury Division (Front Office) and ALM desk under regular supervision, of Top Management reviews the overall liquidity position of the Bank and takes appropriate strategy, process in line with the industry position for managing liquidity risk of the Bank.</li> </ul>	

#### Quantitative Disclosures

b)	SL No.	Particular	As on 31 December 2023

## Leverage Ratio

LC				
Qua	Qualitative Disclosures			
a)	i) Views of BODs on system to reduce excessive leverage	<ul> <li>The Board of Directors of the Bank primarily views the growth of the On and Off-balance sheet exposures commensurate with its expected capital growth so that the excessive leverage is reduced. Within the On-balance components, again, the Board emphasizes on the growth of the prime component i.e. the loans and advances and maintaining good asset quality so as to maximize the revenue as well as the capacity to generate capital internally (in the form of retained earnings) to trade off the excessive leverage supposed to be caused by asset growth.</li> <li>At the outset of asset growth, the Board also views the growth of its sources of fund i.e. deposit growth taking into consideration of projected business growth so that the credit-deposit ratio is maintained at a sustainable basis as well as to reduce the mismatches of asset liability gap within the tolerable limit to manage the liquidity risk.</li> </ul>		
	ii) Policies and processes for managing excessive on and off-balance sheet leverage	<ul> <li>First and foremost, Bank's policy is to maintain the Leverage Ratio (Tier 1 capital as proportion to total adjusted On and Off - balance sheet asset) well above the regulatory requirement. To this end, the striking components of balance sheet, namely, the deposits &amp; borrowing, loans &amp; advances, other liquid assets (treasury bills, bonds, fund placements) are analyzed on monthly basis.</li> <li>Measures are taken to contain the growth of overall size of balance sheet (On and Off-balance sheet exposures aggregately) considering short term outlook of the industry indicators as well as possible growth of equity (Tier 1 capital) of the Bank on quarterly rest.</li> <li>With regard to managing the excessive leverage, the regulatory stance through the monetary policy initiatives i.e. the scope of expected business potential (growth) estimated money supply, inflation, resulting the estimated overall liquidity of the industry as well as the</li> </ul>		
	iii) Approach for calculating exposure/ Leverage	Bank in particular is also considered. For calculating "Leverage", the Bank follows the 'Leverage Ratio' approach/ method as suggested by Bangladesh Bank as under:		
		Leverage Ratio (LR) = Total Exposure (after related adjustment) Total Exposure (after related deductions)

#### Remuneration

b

#### Qualitative Disclosures

a) Information relating to the bodies that oversee remuneration.

	i) Name of the bodies that oversee remuneration	At the management level, primarily the Human Resources Division oversees the 'remuneration' in line with its HR management strategy/ policy under direct supervision and guidance of Management Committee (MANCOM) of the Bank.
	ii) Composition of the main body overseeing remuneration	The MANCOM is headed and chaired by the Managing Director & CEO of the Bank; along with other members of top executive management (Deputy Managing Directors and CXOs). Head of Human Resources Division acts as the Member Secretary of the MANCOM of the Bank.
	iii) Mandate of the main body overseeing remuneration	The mandate of the Management Committee (MANCOM) as the main body for overseeing the Bank's remuneration is to review the position of remuneration and associated matters and recommend to the Board of Directors for approval of its restructuring, rearrangement and modification commensurate with the industry best practices as per requirement.
	iv) External consultants whose advice has been sought, the body by which they were commissioned, and in what areas of the remuneration process	The Bank has no External Consultant permanently regarding 'remuneration' and its process. However, experts' opinion may have been sought in case to case basis regarding income tax matter, lawyers' opinion for settlement of employees' dues in case of death, penalty etc. if required, by the management.
	<ul> <li>v) A description of the scope of the bank's remuneration policy (e.g. by regions, business lines), including the extent to which it is applicable to foreign subsidiaries and branches</li> </ul>	The Bank does not differentiate the 'Pay Structure' and 'employee benefits' by regions. However, variation in remuneration is in practice based on nature of job/ business line/ activity primarily bifurcated for the employees who are directly recruited by the Bank and the headcounts/ employees explored through outsourcing service providers as per rule.
		As of 31 December 2023, the Bank had no foreign subsidiaries and branches outside Bangladesh.
	vi) A description of the types of employees considered as material risk takers and as senior managers, including the number of employees in each group	We consider the members of senior management, branch managers and the employees engaged in different functional divisions at Head Office (except the employees involved in internal control, risk management and compliance) as the material risk takers of the Bank.
b)	Information relating to the design and structur	e of remuneration processes.
	i) An overview of the key features and objectives of remuneration policy.	Remuneration and other associated matters are guided by the Bank's Service Rules as well as instruction, guidance from the Board from time to time in line with the industry practice with the objectives of retention/ hiring of experienced, talented workforce focusing on sustainable growth of the Bank.
	<ul> <li>ii) Whether the remunerati on committee reviewed the bank's remuneration policy during the past year, and if so, an overview of any changes that were made.</li> </ul>	Human Resources Division under guidance of MANCOM, the Board and senior management reviews the issues of remuneration & its associated matters from time to time.
	<ul> <li>iii) A discussion of how the bank ensures that risk and compliance employees are remunerated independently of the businesses they oversee.</li> </ul>	The risk and compliance employees are carrying out the activities independently as per specific terms of references, job allocated to them.
	businesses they oversee.	Regarding remuneration of the risk and compliance employees, Human Resources Division does not make any difference with other mainstream/ regular employees and sets the remuneration as per the prevailing rule of the Bank primarily governed by the employees' service rule of the Bank.

muneration (Continued)			
	e risks are taken into account in the remuneration processes.		
i) An overview of the key risks that the bank	The business risk including credit/ default risk, compliance &		
takes into account when implementing remuneration measures.	reputational risk are mostly considered when implementing the remuneration measures for each employee/group of employee. Financial and liquidity risk are also considered.		
<ul> <li>ii) An overview of the nature and type of the key measures used to take account of these risks, including risks difficult to measure.</li> </ul>	Different set of measures are in practice based on the nature & type of business lines/ segments etc. These measures are primarily focused on the business target/ goals set for each area of operation, branch vis -a-vis the actual results achieved as of the reporting date. The most vital tools & indicators used for measuring the risks are the asset quality (NPL ratio), Net Interest Margin (NIM), provision coverage ratio, credit- deposit ratio, cost-income ratio, growth of net profit, as well the non-financial indicators, namely, the compliance status with the regulatory norms, instructions has been brought to all concerned of the Bank from time to time.		
iii) A discussion of the ways in which these measures affect remuneration.	While evaluating the performance of each employee annually, all the financial and non- financial indicators as per pre - determined set criteria are considered; and accordingly the result of the performance varies from one to another and thus affect the remuneration as well.		
<ul> <li>iv) A discussion of how the nature and type of these measures has changed over the past year and reasons for the change, as well as the impact of changes on remuneration.</li> </ul>	No material change has been made during the year 2023 that could affect the remuneration.		
Description of the ways in which the bank seeks to link performance during a performance measurement period with levels of remuneration.			
<ul> <li>An overview of main performance metrics for bank, top-level business lines and individuals.</li> </ul>	The Board sets the Key Performance Indicators (KPIs ) while approving the business target/ budget for each year for the Bank and business lines/ segments. The management sets the appropriate tools, techniques and strategic planning (with due concurrence/ approval of the Board) towards achieving those targets. The most common KPIs are the achievement of loan, deposit and profit target with the threshold of NPL ratio, cost - income ratio, cost of fund, yield on loans, provision coverage ratio, capital to risk weighted asset ratio (CRAR), ROE, ROA, liquidity position (maintenance of CRR and SLR) etc.		
remuneration are linked to bank-wide and individual performance.	The remuneration of each employee is paid based on her/ his individual performance evaluated as per set criteria. And, accordingly, the aggregate amount of remuneration of the Bank as a whole is linked/ impacted to the same extent.		
<ul> <li>iii) A discussion of the measures the bank will in general implement to adjust remuneration in the event that performance metrics are weak.</li> <li>This should include the bank's criteria for determining "weak" performance metrics.</li> </ul>	The Bank follows remuneration process as per set criteria with no in general adjustment in the event of weak performance metrics/ scorecard.		
Description of the ways in which the bank seek to adjust remuneration to take account of longer-term performance.			
<ul> <li>i) A discussion of the bank's policy on deferral and vesting of variable remuneration and, if the fraction of variable remuneration that is deferred differs across employees or groups of employees, a description of the factor that determine the fraction and their relative importance.</li> </ul>	The Bank pays variable remuneration i.e. annual increment based on the yearly performance rating on cash basis with the monthly pay. While the value of longer term variable part of remuneration i.e. the amount of provident fund, gratuity fund are made provision on aggregate/ individual employee basis; actual payment is made upon retirement, resignation etc. as the case may be, as per rule.		
	<ul> <li>i) An overview of the key risks that the bank takes into account when implementing remuneration measures.</li> <li>ii) An overview of the nature and type of the key measures used to take account of these risks, including risks difficult to measure.</li> <li>iii) A discussion of the ways in which these measures affect remuneration.</li> <li>iv) A discussion of how the nature and type of these measures has changed over the past year and reasons for the change, as well as the impact of changes on remuneration.</li> <li>Description of the ways in which the bank seeks to levels of remuneration.</li> <li>ii) A noverview of main performance metrics for bank, top-level business lines and individuals.</li> <li>iii) A discussion of the measures the bank will in general implement to adjust remuneration in the event that performance metrics are weak.
