In cases, any requirement of provisions and circulars issued by Bangladesh Bank differs with those of other regulatory authorities, the provisions & circulars issued by Bangladesh Bank prevailed. Material departures from the requirement of IAS & IFRS are as follows:

### **2.1.1 Investment in shares and Securities**

#### **IFRS**

As per requirements of IFRS 9, classification and measurement of investment in shares and securities will depend on how these are managed (the entity's business model) and their contractual cash flow characteristics. Based on these factors it would generally fall either under "at fair value through profit or loss account" or under "at fair value through other comprehensive income" where any change in the fair value (as measured in accordance with IFRS 13) at the year-end is taken to profit and loss account or other comprehensive income respectively.

#### **Bangladesh Bank:**

As per BRPD circular no. 14 dated 25 June 2003 investments in quoted shares and unquoted shares are revalued at the year end at market price and as per book value of last audited balance sheet respectively. Provision should be made for any loss arising from diminution in value of investment.

### **2.1.2 Revaluation gain/loss on Government securities**

#### **IFRS**

As per requirement of IFRS 9, all financial assets are into two classifications - measured at amortised cost and measured at fair value. For securities like treasury bills and treasury bonds designated as "held for trading" falls under "fair value measurement" and any change in the fair value is recognized through fair value through profit and loss account. T-bills and T-Bonds not designated as "held for trading" (i.e., held to maturity) are measured at amortized cost method and interest income is recognized through the profit and loss account.

For loans & Advances whose credit risk increased significantly since initial recognition, a loss allowance for full lifetime expected credit losses is required. For loans & advances whose credit risk didn't increased significantly, a loss allowance equal to the 12-month expected credit losses is required.

#### **Bangladesh Bank:**

As per BRPD circular No.24 (17 November 2019), BRPD circular No.6 (19 May 2019), BRPD circular No.4 (16 May 2019), BRPD circular No.3 (21 April 2019), BRPD circular No.15 (27 September 2017), BRPD circular No.16 (18 November 2014), BRPD circular no. 14 dated 23 September 2012, BRPD circular no. 19 dated 27 December 2012, BRPD circular no. 05 dated 29 May 2013 & BRPD circular no. 16 dated 18 November 2014, a general provision @ 0.25% to 2% under different categories of unclassified loans (good/standard loans) has to be maintained regardless of objective evidence of impairment. #### **Bangladesh Bank:**

As per BRPD circular no. 14 dated 23 September 2012, once a loan is classified, interest on such loans are not allowed to be recognized as income, rather the corresponding amount needs to be credited to an interest in suspense account, which is presented as liability in the balance sheet.

IFRS 16 defines that a contract is (or contains) a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. IFRS 16 significantly changes how a lessee accounts for operating leases. Under previous IAS 17, an entity would rent an office building or a branch premises for several years with such a rental agreement being classified as operating lease would have been considered as an off balance sheet item. However, IFRS 16 does not require a lease classification test and hence all leases shall be accounted for as on balance sheet item (except some limited exception i.e. short-term lease, leases for low value items).

Under IFRS 16, an entity shall be recognizing a right-of-use (ROU) asset (i.e. the right to use the office building, branches, service center, call center, warehouse, etc.) and a corresponding lease liability. The asset and the liability are initially measured at the present value of unavoidable lease payments. ## 2.19 Approval of the financial statements

The Board of Directors of the Bank in its 269th meeting held on 26 July 2023 approved the financial statements of the Bank for the period ended 30 June 2023.

### **3.1 Risk Management**

Banking risk is defined by DBBL as prospect of potential losses or foregone profits that can be triggered by internal and external factors. The objective of risk management system is to identify, assess, record and actively manage any internal and external risks that could pose a threat to the attainment of the core objectives of the Bank. Therefore, as part of risk management system potential risks in Bank's operations and transactions, in assets, liabilities, income, costs and off-balance sheet items identified and assessed, and timely and adequate measures are initiated to actively manage and mitigate such risks within a risk-return framework. In DBBL, only calculated banking risks are taken while conducting banking business to strike a balance between risks and returns. Risks are clearly identified, quantified, mitigated or minimized to protect capital and maximize value to the shareholders.

#### **3.1.1 Core risk management**

Within risk management framework, all core banking risks of DBBL are proactively managed. Bank's risk management system adequately complies with an effective risk management system as required by BRPD circular no.17 (7 October 2003) and BRPD circular no.4 (5 March 2007). Bangladesh Bank monitors the progress of implementation of its risk management guidelines through on-site inspections and off-site supervisions. The risk management systems in place at the Bank are discussed below.

##### **3.1.1.1 Credit risk**

Credit risk is the most significant and inherent risk in banking business. Every loan exposure or transaction with counterparty involves the Bank to some extent of credit risks. Credit Risk Management is at the heart of the overall risk management system of the Bank. It is designed and regularly updated to identify, measure, manage and mitigate credit risk to maintain and improve quality of loan portfolio and reduce actual loan losses and to ensure that approved processes are followed and appropriate due diligence are made in approving new credit facilities and renewals.

The salient features of credit risk management practices in place at different levels of DBBL management and board are as under:

- I. Credit policy is approved by the Board
- II. Credit approval is delegated properly
- III. Independent Credit Risk Management Division is responsible for assessing and mitigating credit risk
- IV. Separate Credit Administration Division is responsible for documentation and disbursements
- V. Independent Special Asset Management Division is responsible for managing non-performing loans
- VI. Adequate loan-loss provisions (principal) and interest suspense accounts are maintained
- VII. Conducting Internal Credit Risk Rating (ICRR) for mitigating credit risk
- VIII. Eligible Borrowers' credit ratings are conducted for assessing client and industry specific credit risk
- IX. Credit operations are regularly audited by independent Internal Audit Division
- X. Early warning system is in place for raising red flag for potential credit problem for taking timely actions
- XI. Board of directors of the Bank, Executive Committee and Risk Management Committee of the board are regularly and adequately reported on existing and potential credit risks of the Bank and measures taken by the management for mitigating such credit risks
- XII. Environmental issues are properly assessed and mitigated while financing any project or industry

##### **3.1.1.2 Asset liability management risk**

The Asset-Liability (ALCO) management risk includes the process, procedures for managing & mitigating liquidity risk, interest rate risk, and foreign exchange risk of DBBL. ALCO works under specific Terms of References (functions) approved by the Board. Treasury Division (Front Office) and ALM desk under regular supervision of ALCO reviews the overall liquidity, interest rate and foreign exchange exposures and risk of DBBL and take appropriate measures in line with industry best practice.

##### **3.1.1.3 Liquidity risk**

Liquidity risk is the risk that we may not meet our financial obligation as they become due. Liquidity risks also include our inability to liquidate any asset at reasonable price in a timely manner. It is the policy of the Bank to maintain adequate liquidity at all times in both local and foreign currencies. Liquidity risks are managed on a short, medium and long-term basis. There are approved limits for credit/deposit ratio, liquid assets to total assets ratio, maturity mismatch, commitments for both on-balance sheet and off-balance sheet items and borrowing from money market to ensure that loans and investments are funded by stable sources, maturity mismatches are within limits and that cash inflow from maturities of assets, customer deposits in a given period exceeds cash outflow by a comfortable margin even under a stressed liquidity scenario.

##### **3.1.1.4 Interest rate risk**

Interest rate risk is the potential impact on the Bank's earnings and net asset value due to changes in market interest rates. Interest rate risk is the result of mismatches of interest rate re-pricing of financial assets and liabilities. DBBL uses the following tools for measuring the interest rate risk:

###### **a. Gap analysis**

Under this system, a gap i.e. the difference between the amount of financial assets and the amount of liabilities is calculated at a pre-determined time bucket. The interest rate factor is then applied on the assessed financial value of Gap for measuring the earning impact due to movement of interest rate.

b. Duration analysis

Duration is the time-weighted average maturity of the present value of the cash flows from on balance sheet assets and liabilities. It measures the relative sensitivity of the value of these instruments to changing interest rates and therefore reflects on the economic value i.e. the present value of shareholders' equity of the Bank.

**3.1.1.5 Foreign exchange risk**

Foreign exchange risk is the potential loss arising from changes in foreign currency exchange rate in either direction. Assets and liabilities denominated in foreign currencies generally entail foreign exchange risks.

The Bank operates its foreign exchange and money market activities under a centralized and single functional area. DBBL's dealing room is equipped with advanced technology and experienced personnel. Bank's Exchange Rate Committee meets on a daily basis to review the prevailing market condition, exchange rate, exposure and transactions to mitigate foreign exchange risk.

**3.1.1.4 Internal control and compliance**

Internal Control and Compliance (ICC) ensures compliance with laws and regulations, policies and procedures issued by both the bank management and the regulators. ICC enhances confidence over the bank and facilitates risk based bank examination. This is one of the means for reducing potential losses associated with unwanted events.

Banking is a diversified financial activities involving different risks. The issues of effective internal control system, good governance, transparency of all financial activities, accountability towards its stakeholders and regulators are highly important for ensuring smooth performance of the banking company. An effective internal control & compliance system has no alternative for protecting the stakeholders of a banking company.

Dutch-Bangla Bank Limited has established an appropriate and effective internal control environment through the Board of Directors, Management, organizational and procedural controls and an independent audit mechanism in order to ensure that the Bank is managed and controlled in a sound and prudent manner.

Internal Control and Compliance (ICC) operates independently as a division consisting of four units (Audit & Inspection, Compliance, Monitoring & ICC Secretariat) with prime responsibility to determine risks by evaluating overall Business, Operations & Credit Portfolios of the Bank. The key objective of ICC is to assist and guide in all aspects of the bank using adequate resources for identification of weaknesses and taking appropriate measures to overcome the same to be a compliant bank.

**3.1.1.5 Operational Risk**

Operational risk can be defined as the possibilities of losses resulting from inadequacy or failed internal processes, systems and people or from external events.

Operational risk includes legal and regulatory risk, business process and change risk, fiduciary or disclosure breaches, technology failure, financial crime and environmental risk. It exists in some form in every Bank business and function. Operational risk can not only result in financial loss, but also regulatory sanctions and damage to the Bank's reputation. DBBL is successful at managing operational risk with a view to safeguarding client assets and preserving shareholder value.

DBBL manages operational risks in the following manner:

- I. Risks are identified with reference to the relevant policy manuals, processes, and practices;
- II. Departmental Control Function Check List (DCFCL) is in place for evaluation of control;
- III. Review of safety and control measures of premises and equipments;
- IV. Management of technological and information security risks; and
- V. Ensuring the Bank's business continuity while facing unforeseen crisis under a business continuity and disaster management plan.

**3.1.1.6 Money Laundering Risk and Terrorist Financing Risk**

The Government through its bodies, particularly 'Bangladesh Financial Intelligence Unit (BFIU)' has been playing a vital role to enhance the compliance status of Anti-Money Laundering (AML) and Combating the Financing of Terrorism (CFT) among the local banks & financial institutions. Bangladesh has become the prestigious Co-Chair of the APG (Asia-Pacific Group on Money Laundering). All these have made our country viable and reliable to both the global regulators and investors. DBBL has become confident to nourish its financial-system and structure with more dynamism and professionalism to protect its customers' deposits and reputation from any Money Laundering (ML) or Terrorist Financing (TF) risks.

The Bank, under the legal framework of the "Money Laundering Prevention Act, 2012 ( amended in 2015)" and Anti Terrorism Act, 2009 (amended in 2013), has been pursuing the policy of strict compliance with all regulatory directives and culture of good governance in all aspects of its banking services and operations.

**3.1.1.7 Legal Risks**

In DBBL, legal risks are covered by recognizing potential losses from litigation or possible litigation at an early stage and by formulating solutions for reducing, restricting and avoiding such risks and creating adequate provision there- against.

### 3.1.1.8 Business Risk

Business risk covers the risk of losses arising from lower non-interest income and higher expenses from the budgeted amount. The business risk is resulted from the market condition, greater customer expectation and / or technological development that may be significantly different from the assumptions made at the time of planning.

Business risk in DBBL is managed by setting clear targets for specific business units, in terms of business volume, income, cost, cost-income ratio, quality of assets etc. with an ongoing process of continuous improvement.

### 3.1.1.9 Reputational Risk

Reputational risk is defined as the risk of losses, falling business volume or income as well as reduced value of the company arising from business events that may reduce the confidence of the customers & clients, shareholders, investors, counterparties, business partners, credit rating agencies, regulators and general public in DBBL.

The branches and operational divisions are directly responsible for reputational risks arising from their business operations. Reputational risks may also arise from a deficiency in managing other risks. All risk must therefore be managed effectively in order to uphold the Bank's reputation. The management ensures that DBBL is aware of any changes in market perceptions as soon as possible. Accordingly, all business policies and transactions are subjected to careful consideration. DBBL takes necessary precautions to avoid business policies and transactions that may result in significant tax, legal or environmental risks. Reputational risk is also factored into major credit decisions that may lead to credit proposal being declined.

### 3.1.1.10 Compliance Risk

The success of DBBL is largely dependent on the trust and confidence of our existing and potential customers, our shareholders, our staff, our regulators and the general public in our integrity and ethical standard. The confidence largely depends on meticulous compliance with applicable legal and regulatory requirements and internal policies of DBBL. The confidence also depends on conformity with generally accepted market norms and standards in our business operations. The Board of Directors is primarily responsible for compliance with all applicable norms and regulations. The Board discharges its responsibilities itself and through delegation of authorities to Executive Committee, Audit Committee and Risk Management Committee of the Board. The objective is to identify any compliance risks at an early stage that may undermine the integrity and the success of DBBL and to mitigate the risks in most appropriate way.

### 3.1.1.11 Technology Risk

Technology risk is the risk of financial loss arising from failure, exploitation of vulnerabilities or other deficiencies in the electronic platforms that support our daily operations and the system applications and infrastructure on which they reside. As a component of operational risk, technology risk is inherent not only in our IT assets, but also in the people and processes that interact with them. Cyber risk, which is part of technology risk, is the risk that our systems will not operate properly or will be compromised as a result of cyber-attacks, security breaches, unauthorized access, loss or destruction of data, unavailability of service, computer viruses or other events that could have an adverse security impact. Any such event could subject us to litigation or cause us to suffer a financial loss, a disruption of our businesses, liability to our clients, regulatory intervention or reputational damage. We could also be required to expend significant additional resources to modify our protective measures or to investigate and remediate vulnerabilities or other exposures. Service and infrastructure disruption risks are managed through our business continuity management plan, our technology risk management program and other contingency and resiliency plans. Although we have business continuity plans, our businesses face a wide variety of operational risks, including technology risk arising from dependencies on IT, third-party suppliers and the worldwide telecommunications infrastructure. As a large IT investment financial services company in Bangladesh, we operate in a complex technological landscape covering our diverse business model. Ensuring that the confidentiality, integrity and availability of information assets are protected is critical to our operations.
